

## TT ° (BANTAM) CIRCUIT GUARD PLUGS

## TT ° (BANTAM) CIRCUIT GUARD PLUGS

### APPLICATION

Circuit guard plugs snap into TTJax<sup>®</sup> (bantam) jacks eliminating accidental or unauthorized insertion of a plug into a critical circuit. The circuit guards plugs do not actuate the jack springs. These plugs seal the jack bushing and provide an additional means of circuit identification.

Circuit guard plugs are available in two different designs: Series TT512 and Series TT513. The designs are molded thermoplastic and are available in the following colors: red, black.

### SERIES TT512

TT512 circuit guard plugs cover an individual jack opening and insert to an virtually flush position with the front panel.

### SERIES TT513

TT513 circuit guard plugs are similar to the Series TT512 except the button extends .219 inches from the front of the panel for easier removal.

### SPECIFICATIONS

**TT512 and TT513:** Molded thermoplastic in colors.

**Marking Strip:** Matte finish white plastic.

**Cover:** Clear extruded plastic.

### ORDERING

1. Order by part number from table.
2. Contact Switchcraft for any special order items.

Part Number	Part Number	Color
TT5121	TT5131	Red
TT5122	TT5132	Black
* Includes base, marking strip & cover
